AGAINST MODERN ATM ATTACKS**

EPIK SHIELD

Proactive Protection Against Modern ATM Attacks

Financial Institutions Today Face Increasingly Sophisticated ATM Threats—from jackpotting attacks to coordinated physical breaches. traditional alarm-based systems alert you after an event has begun.

EPIK Shield is engineered to stop the event entirely.

The moment suspicious activity or a jackpotting attempt is detected, **EPIK Shield immediately cuts power to the ATM**, rendering the machine inoperable before cash can be dispensed. This real-time intervention transforms ATM security from reactive notification to active prevention.

Always on. Fully automated. Designed to protect assets, customers, and brand reputation—24/7.

Why EPIK Shield™

Most ATM security solutions rely on sirens or alerts, creating noise but not stopping loss.

EPIK Shield takes decisive action.

- Stops cash-out events in real time — not after the fact
- Eliminates dependency on human response time
- Reduces financial exposure and operational disruption
- Delivers enterprise-grade visibility and control

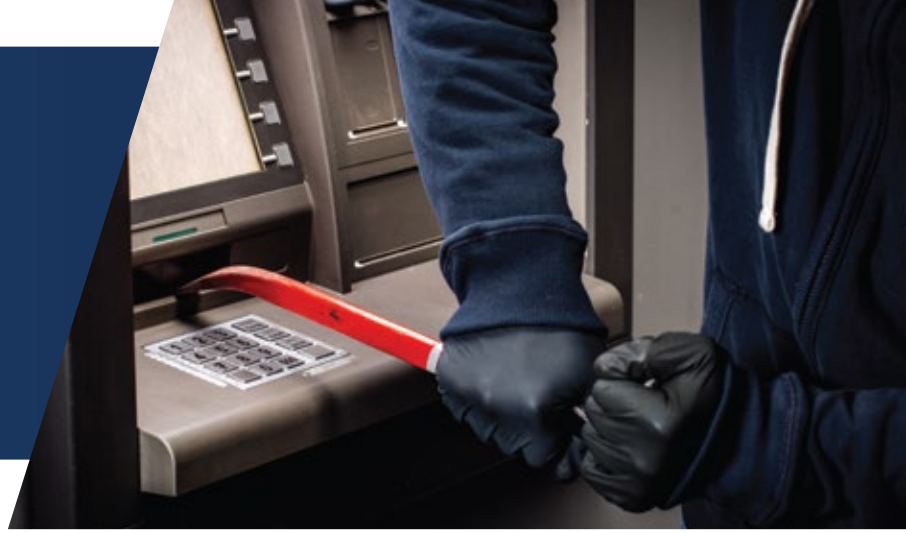

This is not just detection. This is intervention.

Remote Dashboard Monitoring

EPIK SHIELD

Proactive Protection Against Modern ATM Attacks

EPIK Shield™ Key Capabilities

Immediate Power Interruption

Instantly disables the ATM upon detection of jackpotting or malicious activity—preventing cash extraction.

Intelligent Time Lock Controls

Schedule activation windows aligned with operating hours to enhance after-hours protection.

Integrated GPS Tracking with Battery Backup

Up to 10 days of battery life ensures continuous tracking—even during power loss or physical removal attempts, including hook-and-chain attacks.

Door Breach Response

Automatically cuts power the moment the ATM cabinet (“top hat”) is opened without authorization.

Power & Network Tamper Detection

Monitors and responds to power disruption and Ethernet tampering—common precursors to attack.

Real-Time Management Dashboard

Centralized visibility into device status, alerts, and activity—with the ability to remotely restart units when appropriate.

Dual SIM Connectivity

Redundant wireless communication ensures continuous connectivity and reliability across networks.

Seamless Deployment

EPIK Shield is designed for rapid, non-disruptive implementation:

- Fully wireless architecture — no dependency on existing network
- No complex retrofits or reconfiguration required
- Compatible with virtually all ATM platforms
- Scalable across single sites or enterprise fleets

Deployment is fast. Integration is effortless. Protection is immediate.

EPIK SHIELD

Proactive Protection Against Modern ATM Attacks

A Smarter Standard for ATM Security

As ATM threats continue to evolve, financial institutions must move beyond alert-based systems to solutions that actively prevent loss.

EPIK Shield sets a new standard—combining real-time intervention, intelligent monitoring, and operational control in a single platform.

Performance Comparison

CAPABILITY	WITTENBACH EPIK SHIELD	COMPARABLE SOLUTIONS
SECURITY APPROACH	Active Prevention ✓	Detection Alert ✗
STOPS CASH DISPENSING	YES (Power Cut) ✓	No ✗
RESPONSE TYPE	Automated, Immediate ✓	Manual / Reactive ✗
ALARM SIREN	Secondary and Optional ✓	Primary ✗
GPS TRACKING	YES ✓	NO ✗
BATTERY BACKUP	YES (Multi-Day) ✓	Limited ✗
REMOTE CONTROL	Dashboard + Restart ✓	Limited / None ✗
NETWORK RESILIENCE	Dual SIM ✓	Varies ✗
OUTCOME	Stops Loss ✓	Alerts to Loss ✗
